

AI ordering agents for restaurants.

Bytes is the AI ordering and guest platform for restaurants — agents that capture every order, remember every guest, and bring every one back.

Built by Bytes · direct pickup ordering, no marketplace fees

THE PROBLEM

CALLS GO UNANSWERED

33% of calls go unanswered, and 85% of those guests never call back.

Each one is a \$30–50 order lost.

MARKETPLACES OWN THE GUEST

Marketplaces take up to 30% per order.

And the customer data stays with them, not the restaurant.

EVERYTHING IS DISCONNECTED

Phone, web, app, and loyalty run on separate systems.

No single guest profile, no way to win anyone back, and no technical staff to manage it all.

Restaurants are renting their own customers.

PRODUCT & REVENUE MODEL

PRODUCT	DESCRIPTION	PRICE / MO	STATUS
AI Hostess Voice & Text Ordering	Takes complete orders by voice and text: modifiers, allergies, upsells, reservations. Recognizes returning guests and their usual order. Fluent in 65+ languages, handles 100,000 concurrent calls.	\$100–\$250 + 3% of sales	LIVE
AI Website Builder Direct Ordering Websites	Bytes builds each location’s ordering website: conversion-optimized, on-brand, pickup and delivery, one-tap reorder, food video menus. Direct orders, no middleman.	\$250 + 3% of sales	LIVE
AI App Builder Branded Mobile Ordering	The same direct ordering experience as a native app on the guest’s phone — push notifications, one-tap reorder, no marketplace between you and the guest.	\$100 + 3% of sales	IN DEV
Loyalty Wallet Passes	Points, rewards, and Apple/Google wallet passes with geofencing. Text campaigns and automated win-backs that fire on guest behavior.	\$50	LIVE

Powered by AI Guest Intelligence: every order from any channel resolves to one guest profile, with one dashboard across all locations.

WHY NOW

01

Voice AI is finally good enough

Natural conversation, instant answers, real orders handled end to end. Costs have fallen enough that it pays for itself at a single location.

02

Operators are adopting technology

Marketplace fees pushed restaurants toward direct ordering, and owners now actively buy software that keeps the order, the guest, and the data.

03

Labor costs made automation urgent

Wages are up and front-of-house roles are hard to fill. Capturing every order without adding staff is now a cost decision.

COMPETITIVE LANDSCAPE

COMPANY	WHAT THEY SELL	PRICING	THE GAP
Bytes AI This deck	Voice + text ordering, direct ordering websites, branded apps, and loyalty — on one guest identity layer.	From \$100/mo + 3% of direct sales	Priced to land under every point solution, and paid on the revenue it creates.
Loman AI AI phone answering	Flat-fee AI receptionist for restaurants: answers calls, FAQs, and phone orders; POS injection on the premium tier.	\$199–\$299/mo + \$149 setup	Phone only — no ordering website, app, loyalty, or cross-channel guest profile.
Kea AI Voice ordering for chains	Voice AI that answers calls and pushes orders into the POS; skews toward larger multi-location operators.	\$450/mo Custom for 20+ locations	One channel at 3–4× Bytes’ entry price — no direct-ordering web or guest layer.
Maple AI AI phone assistant	Call answering and bookings; order-taking reserved for higher tiers. Distributes through POS partnerships.	From ~\$150/mo Entry tier capped at 100 calls	Caps calls at entry, gates ordering — and owns no direct channel for the restaurant.
Hostie AI AI host · calls, texts, emails	Guest-communication automation: reservations, questions, and messages across channels.	From \$199/mo + \$0.05/min overages	Guest comms, not commerce — no ordering rails, so it answers guests but doesn’t capture revenue.

Competitor pricing is public or reported pricing as of August 2026.

THE MOAT

01

Data that compounds

Every order deepens the guest graph — preferences, usuals, win-back triggers. A competitor lands on day one with an empty database; the AI that already knows the guest sells more from the first ring.

02

Switching costs, multiplied

Phone, website, app, and loyalty run on one contract and one guest layer. Leaving Bytes means ripping out four systems at once — and abandoning the guest history that powers all of them.

03

A channel money can't buy

Bytes' wholesale distribution partner is an investor, and Bytes runs the only booth inside its four locations — equity-aligned and exclusive, not a paid listing a competitor can outbid next quarter.

DISTRIBUTION ADVANTAGE

WHOLESALER'S ACTIVE CUSTOMERS

8,000+

Restaurant owners already buying from the partner every week.

WHOLESALE LOCATIONS

4 booths

On-site Bytes sales presence at every location.

EXCLUSIVITY

Only booth

The wholesaler is an investor — no competitor can buy a presence inside.

GO-TO-MARKET · THE PATH TO 1,500 LOCATIONS

Three motions compound: partner-led distribution, a repeatable direct sales playbook, and community-led demand.

TARGET CAPACITY

1,920 accounts / year

From ISO resellers alone once the partner program launches — 16 ISOs × 120 accounts each, before direct sales adds a single location.

PARTNER PROGRAM · ISOS

16+ ISOs already interested

- Each ISO commits to 120 accounts a year to keep reseller status
- Bytes goes payment-agnostic, so any ISO can resell on top of its own processing

PARTNER PROGRAM · BOOTHS

8,000 owners in reach

- Owners who sign get three months of Bytes fees back as wholesale spending credits
- Structured across four booths with our wholesale strategic investor

DIRECT SALES & MARKETING

Market-launch playbook

- Feet-on-the-street reps in compact markets, paid acquisition in large metros
- Referral program that compounds inside owner networks

COMMUNITY

Chef & creator partnerships

- Chefs and food creators introduce Bytes to their operator audiences
- Low-cost top of funnel that warms both direct and partner channels

SEED SAFE · COMMITTED

\$1.5M

SEED SAFE · OPEN

\$2.5M

USE OF FUNDS

Marketing & GTM

45%

Demand generation and brand, case studies from live locations, trade-show programs, and co-marketing with POS and wholesale partners to lower CAC as the funnel scales.

Product & engineering

25%

AI Hostess and AI Website Builder depth, shipping the AI App Builder and AI Guest Intelligence, reliability at scale, and onboarding automation so a location goes live in days, not weeks.

Sales

20%

First dedicated sales hires converting the 900+ trade-show leads and marketing-generated pipeline into contracted brands.

Wholesale booths

10%

On-site sales presence across all four wholesale locations — the exclusive, equity-aligned channel reaching 8,000+ restaurant owners.

Targets 18–24 months of runway: convert the contracted 460-location pipeline, ship the AI App Builder, and reach the next raise on revenue milestones rather than promises.

FOUNDING TEAM

Moe M.

CO-FOUNDER & CEO

Scaled a restaurant-tech SaaS to \$10M GMV in 18 months. Owner of two food brands.

Mustafa R.

CO-FOUNDER & COO

Payments veteran; scaled a processor to 1,800+ merchants nationwide.

Nader A.

CO-FOUNDER & CPO

Built four SaaS products serving 400,000+ users.

Muthana A.

CO-FOUNDER & CTO

Ex-onsemi AI vision engineer; architected the voice-AI infrastructure.

SEED ROUND · SAFE NOTE

\$1.5M committed · \$2.5M SAFE allocation open

Bytes AI is raising the remaining allocation to scale its marketing and sales engine, convert the signed rollout pipeline, and complete the four-product platform.
